Lander University Institutional Effectiveness Summary 2007

According to Section 59-101-350 of the SC Code of Laws, 1976, as amended, each public institution in the state of South Carolina must submit an Institutional Effectiveness Report annually to the South Carolina Legislature and to the people of the state of South Carolina. Lander University's assessment procedures are very much a part of our mission. Lander University has been an institution dedicated to providing higher education to the people of South Carolina, particularly in the upstate region, from its inception, and we want to show the taxpayers of South Carolina, to whom we are accountable, that our institution is both extremely effective and cost-efficient. At Lander University, each unit establishes its program goals and assessment measures to be consistent with both the university's mission statement and each unit's unique area of expertise. Lander University assesses its effectiveness continually, and we strive to maintain educational excellence while working to improve in any area that demonstrates a need for improvement.

Lander University now follows its own internal cycle of assessment reporting since the CHE discontinued its uniform schedule or program reporting in 2005. Lander's reporting cycle can be found at the <u>Lander Assessment Website</u>. The 2007 Institutional Effectiveness Report for Lander University reports on the assessment of educational effectiveness for the following areas:

MAJORS UNDER REVIEW

Full Reports

- Early Childhood Education
- Elementary Education
- Music Education
- Physical Education
- Secondary Education
- Special Education

Interim Reports

Mass Communication/Theater

OTHER AREAS UNDER REVIEW

• <u>Student Development</u>

ADDITIONAL INFORMATION

- Alumni Survey Summary
- Placement Survey Summary
- Link to Title II report

The various academic units employ a broad array of assessment techniques in their program evaluation, each using multiple measures tailored for the specific qualities of the discipline. The table below summarizes the assessment measures used by the majors under review.

Assessment Measures of Majors under Review

Program Assessment Summary for Education Programs

I. PROGRAM GOALS:

Lander University offers baccalaureate programs in nine areas of teacher preparation. All Lander University's teacher preparation programs share a common set of program goals, regardless of the department in which they are housed. Early Childhood Education, Elementary Education, and Special Education programs are housed within the Department of Teacher Education. Secondary and other K-12 teacher preparation programs are housed within the department that provides appropriate disciplinary background. The Department of Teacher Education collaborates with other academic units to support their teacher preparation programs.

Students graduating from a teacher preparation program at Lander University should demonstrate a range of knowledge, skills and dispositions based on the recommendations of the specialized professional association (SPA) of their particular discipline area and Lander University College of Education's conceptual framework: "Professional Instructional Leader." The conceptual model, which guides all teacher preparation programs at Lander University, is built upon the following **learner outcomes**.

The Professional Instructional Leader:

- 1. integrates content knowledge and skills of scholarly inquiry to teach all students.
- 2. plans, provides and assesses learning experiences that are supported by research, knowledge of best practice and professional standards.
- 3. collaborates with diverse populations, including students, educators, community members, and families for the benefit of learners.
- 4. engages in reflection and professional development to assess and improve content knowledge and pedagogical skills.
- 5. exhibits dispositions that address the needs of all students and that provide leadership to the profession.

Additionally, each teacher preparation program prepares teachers to meet the standards set by its disciplinary specialized professional association (SPA). These program-specific standards comprise the sixth goal for each teacher education program.

Assessment	Goals Addressed (see above)	Frequency of Administration	Frequency of Evaluation
Required PRAXIS II Examinations	6	8 times per year	Annually
Directed Teaching Evaluation	1-6	Each semester	Annually
Number of students who meet the required standard for the State Performance Assessment Instrument (ADEPT)	1-6	Each semester	Annually
Number of graduates qualified for South Carolina certification	1-6	Each semester	Annually
Performance of graduates during the provisional contract years on the State Performance Assessment Instrument (ADEPT)	1-6	Annually	Annually
Lander University Alumni Survey	1-5	Biennially	Biennially

II. MEANS OF ASSESSMENT:

III. OUTCOMES OF ASSESSMENT:

Multiple forms of data are collected and evaluated by faculty members in the Department of teacher Education. Each teacher education program collects and reviews data related to requirements of specialty organizations (SPAs) and other accrediting bodies such as the National Council for Accreditation of Teacher Education (NCATE). Although data is gathered and discussed on a regular basis, data from the 2005-2006 academic year, the most recent data set available at the time of this report, will be used to address the outcomes of assessment.

<u>Required PRAXIS II Examinations</u>. All graduates of teacher preparation programs at Lander University are expected to score at or above the required state standard on required Praxis II exams. During the 2005-2006 academic year each candidate was required to take the Principles of Learning & Teaching (PLT) examination and at least one other discipline-

specific Praxis II examination. The PLT examination primarily provides data on learning outcomes 1-5. The disciplinespecific PRAXIS II tests primarily provide data related to each specialized area of certification (goal 6).

Candidates for teacher certification are allowed to take PRAXIS II examinations multiple times. As demonstrated in Table A, 54 of the 67 Lander University students (81%) taking the PLT during 2005-2006 passed this examination the first time. Of the 13 who failed the exam the first time, one was a practicing teacher who was completing a Masters of Education degree and who took the test as a result of a state certification requirement. As seen in Table A, this student passed the test on the second attempt. The other 12 were from a variety of program areas including Art Education (2 students), Early Childhood Education (3 students), Elementary Education (5 students), Physical Education (1 student), and History (1 student). Although this information is helpful, no trends of strengths or weaknesses were discernible in these results. Therefore, faculty members have recommended no programmatic changes based upon reflection on these test scores. Second attempt test scores were not yet available at the time of this report.

Table B shows the 2005-2006 PRAXIS test scores of Lander students on PRAXIS II specialty tests. One hundred and ninety students took 357 various PRAXIS II specialty tests. Of those 190 students, 147 students passed all of their PRAXIS II non-PLT tests the first time (77%) and 154 passed all specialty tests in the first two attempts (81%).

Results of the test scores were shared with Department of Teacher Education and other teacher preparation faculty members during Department of Teacher Education meetings and Teacher Education Committee meetings. (The Teacher Education Committee is comprised of area public school teachers and administrators and Lander University faculty members from across the university who are directly involved with teacher preparation.) Both groups considered the reasons for strong and poor performances on the part of teacher candidates, but no clear trends were determined. For example, of the 52 Elementary Education majors who took these examinations, 12 had not passed after the second attempt. This is a pass rate of 77% and in keeping with Lander's overall pass rate. However, pass rates among program completers (79% for the elementary Education Curriculum Instruction Assessment exam and 100 % for the Elementary Education, and/or assessment. Elementary Education faculty members are debating these issues as they work to revise the Elementary Education Curriculum for implementation in 2008.

<u>Directed Teaching Evaluation</u>. Students completing directed teaching at the end of their teacher preparation programs undergo two forms of evaluation: (a) a grade of "pass" or "fail" based on their performance in the classroom and (b) overall scores of "at standard" or better on their education portfolios. Both sets of scores are reviewed by appropriate Lander faculty members in committee settings to determine recommended courses of action.

All students completing Lander teacher education programs 2005-2006 received passing grades in directed teaching from their cooperating teachers and university supervisors. Students prepared and presented portfolios to demonstrate their understanding of and abilities related to the five Professional Instructional Leader learner outcomes (see Program Goals). Each of the five learner outcomes has been sub-divided into 22 categories, each of which the students address. Students' portfolios were rated on these 22 items against a rubric that contained the following scale: 1 = Needs Improvement, 2 = Developing, 3 = At Standard, 4 = Exceeds Standard. Scores for 2005-2006 graduates' portfolios (see Table C) indicate that 92% percent of 2005-2006 program completers received passing scores (a rating of "3" or "4" on each of the 22 rated items) on their initial preparation of their portfolios. All graduates not initially receiving satisfactory scores revised weak areas. Thus, 100% of 2005-2006 graduates satisfactorily met directed teaching criteria. Appropriate faculty members review overall portfolio rating scores to determine whether or not changes in current programs are indicated. No changes were recommended based on these assessment measures.

Number of students who meet the required standard for the State Performance Assessment Instrument (ADEPT). In 2005-2006, all graduating students met the initial required standard for Assisting Developing Evaluating Professional Teaching (ADEPT). Students are expected to become acquainted with the state's ten identified performance dimensions (PDs) while completing their teacher education program. Lander students demonstrate their understanding of and ability to implement these ten PDs in their portfolios where they concurrently demonstrate mastery of Lander's five learner outcomes (see Table C). Ninety-two percent of 2005-2006 graduates demonstrated an acceptable level of understanding and implementation of ADEPT PDs on the first attempt. All students successfully demonstrated mastery by the second attempt. Department of Teacher Education faculty members and other appropriate faculty members discuss this data when discussing portfolio completion. There were no recommended changes to the program based on ADEPT 2005-2006 scores.

<u>Number of graduates qualified for South Carolina certification</u>. Candidates who have successfully completed directed teaching and passed all appropriate Praxis I and II examinations are recommended for certification by the Dean of the College of Education. In 2005-2006 all but one of the candidates were recommended. The student who was not recommended for certification had not yet completed all of her Lander requirements. In the semester prior to student teaching, she had failed a general education requirement course, Spanish II. Her attempt to retake this course was not yet successful at the time these students were recommended for certification. Given that all but one student successfully completed all requirements for recommendation for certification in 2005-2006, the data was not discussed at a faculty meeting and no changes were recommended based on this data.

Performance of graduates during the provisional contract years on the State Performance Assessment Instrument (ADEPT). All novice teachers in the state of South Carolina are monitored by personnel in the school districts in which they are employed. These district representatives have been trained in the use of and employ the Assisting Developing Evaluating Professional Teaching (ADEPT) assessment instrument to provide feedback and guidance to novice teachers. Novice teachers are either terminated or issued new contracts based on their performance according to ADEPT measures. The percent of Lander graduates passing ADEPT and qualifying for continuing contract status in 2005 was 100% (see Table D). Provisional contract teachers must pass nine of the ten Performance Dimensions to pass ADEPT.

The number of Lander graduates teaching in South Carolina and achieving continuing certification in 2005-2006 was 37. These graduates have typically completed two years of classroom experience. Lander University had 77 students complete teacher education programs in 2002-2003, two years prior. These students would presumably have completed their second year of teaching in 2005. Although not all Lander graduates achieving continuing contract status in 2005-2006 were from this class, some discussion of the information is warranted. There are several reasons that the remaining graduates have not received continuing certification in South Carolina. Some graduates have taught outside the state of South Carolina for part or all of the three years. Some graduates have chosen to pursue other career paths following graduation. Some may be in the process of receiving continuing certification in South Carolina. The Department of Teacher Education has no reliable means of determining why roughly 52% of the program completers have not achieved continuing certification. This data is not available from the state department and Lander's Department of Teacher Education has no reliable means for garnering this information. What is know with certainty is that, in 2005, all Lander graduates who attempted to pass ADEPT, passed.

Lander University Alumni Survey. Lander's Department of Teacher Education surveys alumni three years following graduation. The most recent survey results available at the time of this report are those from the 2004-2005 survey results. The survey asks alumni to rate their professional practice against 22 items. These 22 items are the same subcategories of the 5 Learner Outcomes (see section I PROGRAM GOALS above) addressed by Lander's Directed Teaching students preparing their final portfolios. The results of these self-reported ratings were overwhelmingly positive. On a four-point scale (1 = Consistently, 2 = Occasionally, 3 = Seldom, and 4 = Not at All), all responding alumni rated themselves positively on 18 of the 22 outcomes (12 outcomes unanimously received ratings of "consistently"; 6 ratings of "consistently and "occasionally").

Additional information provided by the survey indicated that all but two respondents had completed their district's induction process to qualify for continuing certification in the state of South Carolina (ADEPT). The two who had not were not employed as teachers, but as educators in other settings (e.g., teacher for the National Geographic Alliance). Open-ended responses were also overwhelmingly positive. Positive aspects of Lander's undergraduate teacher education programs included (a) lots of clinical experiences and (b) passionate and enthusiastic professors. Respondents volunteered that they had received awards (e.g., coach of the year) and were involved in professional organizations. As might be expected from a voluntary self-report survey, negative remarks were not present, although several suggested that students would benefit from more opportunities to mange classrooms prior to student teaching. Department of Teacher Education faculty members have recommended no changes to programs based on the data collected from these surveys.

Interim Program Assessment Summary for Mass Communication/Theater

The Mass Communication/Theater program has identified five program goals and has been working to improve their assessment activities for these goals. The goals and use of assessment results for improvement are summarized.

Goal 1: To communicate effectively in person as well as through a variety of different media

Goal 2: To analyze and critically evaluate a variety of messages produced in a number of different media

Goal 3: To apply production and management skills appropriate to mass communication or theatre settings

Goal 4: To understand of the historical, ethical and legal issues related to the student's chosen emphasis area

Goal 5: To understand of the business and economic operations of the student's chosen emphasis area

All of these goals are assessed in the following ways:

0

- Assessment1: Students participate in theatre productions, they are critiqued by adjudicators from KC/ACTF, students are surveyed to assess their experience, and theatre faculty conduct post-production reviews
 - Outcome 1: while students are consistently recognized by the adjudicators for the quality of their work, concrete numbers about the number of student nominated to participate in the KC/ACTF Regional Festival were not available
 - data on nomination rates will be collected
 - Outcome 2: students reported they were poorly prepared for some production activities
 - Outcome 3: theatre faculty noted problems in organization, curriculum, and personnel in post-production reviews
 - a theatre faculty member was replaced
 - to give more preparation time for productions, the hours credit for THTR 111 were increased from 1 to 2
 - THTR 017 has been proposed to require theatre students to participate in two performances instead of one.
- Assessment 2: Students produce the *Forum,* a student newspaper, which is evaluated by the Student Publications Advisor and submitted in competitions

- Outcome 1: while student publications have received numerous awards, concrete numbers about the number and types of awards won were not available
 - data on awards will be collected
- Assessment 3: Interns are evaluated by an off-campus supervisor in a professional environment and have portfolios evaluated by supervisors and faculty
 - Outcome 1: in the last 10 years, 99% of students have received a "B" or higher grade in these evaluations
 - Outcome 2: feedback from supervisors indicates students are well prepared and no major change in curriculum is necessary
- Assessment 4: students produce a one-act play for public performance which is critiqued by the faculty
 - Outcome 1: students are expected to score more than 80% on these critiques, however concrete numbers for these critique were not available
 - data on these critiques will be collected
- Assessment 5: freshman and senior students take a general knowledge test of Mass Communication and Theatre information and a 40% improvement is expected.
 - Outcome 1: expected improvement has not been observed in the areas of theatre history, literature, and criticism.
 - a new, full-time faculty member with a Ph.D. in the problem areas has replaced an adjunct who
 previously taught in those areas
 - several problems have been noted with the knowledge test and it is under revision—the department is considering the adoption of a portfolio system of assessment

This interim review, as well as the SACS review team that conducted its review this year, noted deficiencies in the program assessment activities for Mass Communication/Theatre. Several items have been highlighted for change in the future. First, measures specific to each goal must be developed. Second, outcome measures need to be developed to clearly assess student learning rather than opinion or satisfaction. Third, scores and other evaluative data must be consistently collected over time to make meaningful comparisons.

Program Assessment Summary for Student Development

The program assessment plan for student development is now driven by the University's Strategic Plan. The primary means of assessment of these goals has been through open forums and focus groups with various student groups and organizations, led by the Vice President for Student Affairs (VPSA) and the President, and through analysis of usage data. The ACT Student Survey was used in the past to assess student development, but it was discontinued due to its cost (last administered in 2003). However, the ACT is planned for administration in the 2007-2008 academic year and the NSSE was administered in spring 2007 to further assess student opinions.

The following goals for student development are identified in the Strategic Plan (numbers correspond to numbers in the Strategic Plan). A summary of outcomes from the Vice President for Student Affairs' June 1, 2007 Strategic Planning report for each goal are provided below as bullet points.

Objective 2f: Enhance the educational and co-curricular experiences and opportunities outside of the classroom to broaden students' awareness of themselves, others, and current events.

- expanded the intramural program to include 7 sports (3 more than 2005), increasing student participation from 255 in fall 2005 to 406 in fall 2006
- expanded access to the PEES complex during the week and on weekends, increasing use from 20,995 students in 2004-2005 to 21,023 students in 2005-2006
- study facilities in the library were enhanced by providing 56 new chairs and 8 new tables in the bottom floor study area

Objective 2g: Improve the campus environment to increase student safety, comfort, and satisfaction.

- in January 2007, the dining hall was renovated and expanded over 3,000 square feet to bring seating capacity from 336 to 488
- the dining hall is now media ready with an LCD projector, drop-down screens, and wireless internet
- menus were upgraded, and pizza/pasta and grilling stations were added
- a second entrance to the dining hall was added for students coming from the new dormitory

Objective 2h: Develop a comprehensive plan to address diversity issues in the campus community.

- the following were offered in 2006-2007
 - o 2nd annual Hispanic Awareness Celebration was in October, 2006.

- Hispanic Celebration, a Multiplicity of Cultures was held on February 8, 2007.
- o a Variety of Black History Month activities were held in February, 2007.
- provided approved campus organizations to address diversity, including R.O.O.T.S (for freshmen minority students), F.R.I.E.N.D.S (for all sexual orientations), M.O.M.S (growth of minority faculty, staff, and students), and I.S.O. (international students), NPHC (governing historically African-American fraternities), African American Student Nurse Network, National Society of Black Engineers, Spanish Club, Minorities on the Move, and SPICE (Students Promoting Intelligent Choices and Experiences).
- o students visited the Penn Center, which focuses on West Indies culture and the Gullah culture.
- additional staff assignment was made to focus on international students and multicultural affairs programs.
- student representation was provided on 16 university-wide committees
- the President of SGA was included on the Faculty Senate.
- a web calendar was started in January, 2007, to provide information on all university activities.

Objective 3b: Increase involvement of parents, alumni, community members and organizations with Lander.

- approximately 175 volunteers of staff, faculty, alumni, and students helped with Freshmen Move-In Day on August 13 to assist new freshmen and their parents and their families.
- in October, Parent's Day provided an opportunity for parents to come on campus for a fall festival and dinner.
- family EXPO gave parents of new freshmen an opportunity to be involved in expectations for their child.

Objective 4b: Add the facilities needed to serve an increased enrollment of 2630 Full Time Equivalent students.

- continued working on converting the newly-acquired 22 acres into recreational facilities, including fields for baseball and softball and soccer, and tennis courts, with additional facilities to provide for community participation: a walking track, a children's playground, and fitness center. There is an anticipated completion date of 2009.
- continued contact with legislators to discuss funding for addition to student center.

Objective 5a: Implement a coordinated and comprehensive assessment program used to drive decisions, make improvements, and insure institutional effectiveness.

• reintroduced the regular administration of the ACT and NSSE surveys to assess student services.

Alumni Survey Summary

The following information is due August 1, 2007

INSTITUTIONAL ALUMNI SURVEYS - Summary
